Office hours: Sign up online [here](#).

COURSE DESCRIPTION:

Behavioral science uses findings from psychology, economics and other fields to better understand how people actually behave, as opposed to how we would like them to behave. Many of these insights carry significant implications for how to design policies in education, health, energy, taxation, criminal justice, and more. In this course we will review how government agencies and other policymaking institutions have tried to use behavioral insights to improve policy; what have been the successes and failures; what are the ethical considerations in using behavioral science; and what new ideas are on the horizon.

STUDENT GRADES WILL BE DETERMINED AS FOLLOWS:

Class participation: 15%

Three (3) short responses: 25%

Midterm: 30%

Final group presentation + paper: 30%

Final Group Presentation and Paper

Everyone will take part in a group project (3-4 people per group) that will involve applying an idea(s) from the course to a policy problem. Groups will develop a proposed behavioral intervention to solve a public policy, managerial, or social welfare problem with a particular client in mind and will develop an argument for why their proposal should be implemented by the client. For example, a problem of interest might be high rates of worker absenteeism in a specific government agency (federal, state, or local). A behavioral intervention to address the problem might involve mailings to workers emphasizing low absenteeism rates among their peers. Your group would put together a compelling proposal designed to convince management at the agency that they should implement your intervention, detailing both how to deploy it and how to measure its effectiveness. Groups must research their client setting in detail, define the problem to be addressed, describe their proposed intervention, provide a brief review of past research that gave rise to the proposed intervention, and briefly note the methods that could be used for evaluating the intervention.

- INITIAL GROUP SELECTION (By February 26): Please plan to sign-up with the group you plan to work with on your final project in class on February 26th.
- PROPOSAL (April 2): Each group must submit a 1-page, single-spaced summary of its planned project. I will provide feedback on these project proposals. Prior to submitting this assignment each group should plan on meeting with me to talk through their potential project ideas and choose the best one to work on.
- PRESENTATIONS (April 16 and April 23): On these two days of class, each group will have between 5 and 15 minutes (depending on the final number of groups) to present its project to the class.
- PAPERS (Due May 10): Each group must submit a 10-page, double-spaced paper (details will be provided as the semester advances).

REQUIRED READINGS:

All readings will be available online on bcourses.

SCHEDULE OF CLASSES:

<u>DATE</u>	<u>TOPIC</u>
1. JAN 22	INTRODUCTION: BEHAVIORAL SCIENCE IN PUBLIC POLICY
2. JAN 29	PROSPECT THEORY
3. FEB 5	PROSPECT THEORY: POLICY DEEP DIVE
4. FEB 12	SYSTEM 1 AND SYSTEM 2 THINKING
5. FEB 19	SYSTEM 1 AND SYSTEM 2 THINKING: POLICY DEEP DIVE
6. FEB 26	NUDGES vs SLUDGES (ETHICS OF NUDGES)
7. MAR 5	MIDTERM
8. MAR 12	WANT/SHOULD TRADEOFFS
9. MAR 19	COMMITMENT DEVICES
MAR 26: NO CLASS/ SPRING BREAK	
10. APR 2	HOW TO MAKE A NUDGE UNIT

- | | |
|------------|-------------------------------|
| 11. APR 16 | GROUP PRESENTATIONS |
| 12. APR 23 | GROUP PRESENTATIONS |
| 13. APR 30 | LAST CLASS: WHERE TO GO NEXT? |
